

**Lotus**  
FOR A BEAUTIFUL GARDEN - JUST ADD WATER

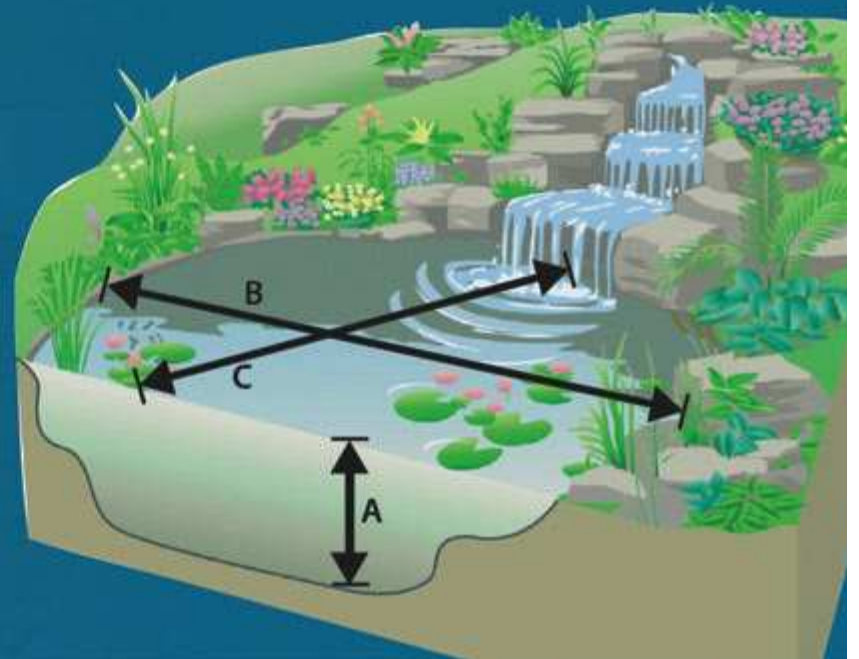

# Introduction to Pond Liners

The use of a pond liner will enable you to create a pond the size and shape you require. Lotus pond liners are manufactured specifically for use in garden ponds. They offer the advantage of suppleness and stretch which allows the liner to mould freely into awkward shapes with the minimum of creases. For guaranteed long life Lotus liners are the right choice.

## Calculating the size of your Pond Liner

As a guide, calculate the size of liner required by adding the maximum pond depth (A) to both length (B) and width (C) of the finished pond. In addition allow up to 0.6m to accommodate for edging stones.

Length equals			
A x 2			m
Plus B	+		m
Plus 0.6 m	+	0.6 m	
<b>Total length</b>	=		<b>m</b>

Width equals			
A x 2			m
Plus C	+		m
Plus 0.6 m	+	0.6 m	
<b>Total width</b>	=		<b>m</b>
